

STONE AGE TO IRON AGE WORD MAT

Palaeolithic, Mesolithic, Neolithic

The three periods of the Stone Age.

Bronze

A metal which is made by combining copper and tin.

Iron

A stronger metal than Bronze.

Nomadic

People that travel throughout their lives. In prehistory, they would follow the sources of food.

Shelter

Somewhere to stay. This can be a house, cave or a 'tent' shelter that can be carried around with people.

Flint

A type of stone that is easy to shape and use to make tools.

Microlith

A small shaped flint tool that can be part of a larger tool such as the tip of a spear.

Barrow

A heap of earth that is placed over prehistoric tombs. It is sometimes surrounded by ditches as well.

Henge

A prehistoric monument that consists of a circle of stones or wood that are upright in the ground.

Star Carr, Skara Brae, Creswell Crags, Maiden Castle, Stonehenge

Some of the most significant prehistoric sites located in the United Kingdom.
